Paper Intermediate Bulk Container (Paper IBC)

Our corrugated paper IBCs are available in square and octagonal designs, with capacities of 800, 1,000, and 1,200 liters. They can be fitted with standard or aseptic liners and come equipped with a discharge valve, filling bridge, heating blanket, and fumigation-treated wooden pallet.

Each IBC undergoes strict quality testing, including box compression, burst strength, and water content analysis, to ensure durability and reliable performance.

Paper Intermediate Bulk Container

Highly recommended for products that are difficult to unload from the corner of the Container Liners.

Product Introduction of G+L Paper Intermediate Bulk Container

With a unique design (Patented), G+L Paper Intermediate Bulk Container has a stronger and harder paper body that is able to withstand high density products.

Benefits and Features for G+L Paper Intermediate Bulk Container

1. Cost Saving

- No disposal, cleaning or return freight cost
- Reduce storage space by 80% as an empty Paper IBC is collapsible and can be palletized, which in return lowers your storage expenses
- Increases by 37.5% as compared to other rigid containers while transport by 20ft container
- Lesser labor required for installation and filling of products
- No extra tools are needed for discharging as the discharging outlet is at the bottom of the Paper IBC

2. Quality

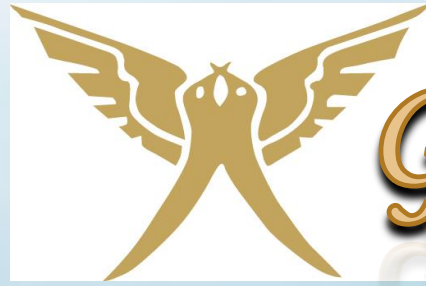

- Stronger body structure
- Able to stack 2 to 3 high in a stationery position
- Certified food grade material used for production.

3. Green Features

- 0% Contamination
- No pollution to the environment
- 100% Recyclable and Biodegradable material
